

**INVESTMENT OBJECTIVE**

Monetta Fund seeks long-term capital growth. It pursues this objective by employing a bottom up, multi-faceted investment approach which combines fundamental, technical and macro-economic factors in its stock selection process.

**INVESTMENT APPROACH**

The Fund's investment approach is based on the belief that the markets are more efficient today than at any time in the past, both in terms of real-time information and internet access. The Adviser believes that "changing investor expectations" is what drives stock prices with price direction and volume tending to be leading indicators. We also focus on improving company fundamentals in terms of exceeding analyst forecast and improved company guidance. We control risk through diversification and constantly monitoring price levels with the objective of realizing gains or minimizing losses.

**INVESTMENT STRATEGY**

The Monetta Fund invests (at the time of investment) at least 65% of its net assets, under normal market conditions, in common stocks of companies of all market capitalization ranges, although the Adviser expects that the Fund will primarily invest in common stocks of large-cap companies (those with market capitalizations of at least \$10 billion).
